Cup1 Logo Guidelines

v1.2 · 5 Nov 2026 · "Cup" + cup-1

1. The idea

The name is written as **"Cup"** and the **1 sits inside a takeaway cup**, so the logo literally says what we do: your cups, number one. The cup doubles as the favicon and app icon. The "1" is a true cut-out (knockout), so it always shows the background color.

2. How we got here

Round	Direction	Outcome
1	A Cup & Lid · B Rim Monogram (C1) · C cup-shaped "u"	B was built as v1.1; the owner asked for a more literal "Cup" + cup-1 idea that stays readable in the navbar
2	"Cup" + cup holding the 1, in teal, navy + orange cup, and navy cup + orange 1 (solid cups; the sleeve-band variant was dropped because it muddied the 1 at small sizes)	**Teal cup chosen by the owner**, so the brand palette is unchanged

3. Logo versions

Primary (light backgrounds)

Reversed

Icon · Tile (favicon/app)

4. Clear space and minimum size

Clear space **x = ¼ of the cup height** (lid to base) on every side. In the full logo, measure x from the cup.

Version	Screen min.	Print min.
Horizontal logo	24 px tall (navbar)	25 mm wide
Icon	24 px	8 mm
Favicon tile (heavier cup)	16 px	–

5. Colors

Use	"Cup" wordmark	Cup icon	Background
Primary	Ink #1C2B2E	Harbor Teal #1F4E5A (1 = cut-out)	White, Paper #F7F3EC, Kraft Tint #EDE5D8
Reversed	Paper #F7F3EC	Paper #F7F3EC (1 = cut-out)	Harbor Teal, Ink, dark photos
One color	All black or all white		Stamps, embossing, one-color print

Contrast: teal on white 9.2:1, teal on Paper 8.3:1, Ink on white 14:1.

6. Don'ts

Stretch | Recolor | Rotate | Add effects | Busy backgrounds

Also: don't write "1" as text next to the cup, don't add a cup sleeve or steam, and don't separate "Cup" from the cup except for the icon-only use.

7. Favicon and app-icon set

File	Size / note
favicon.ico	16, 32, 48 px, heavier cup on a teal tile
favicon.svg	Scalable tile, visible on light and dark tabs
apple-touch-icon.png	180×180, solid teal
icon-192.png · icon-512.png	Android / web app
icon-maskable-512.png	Cup inside the central safe zone
site.webmanifest · favicon-snippet.html	Paste the snippet into the website <head>
