Cup1 Logo Guidelines

v1.0 · 5 Nov 2026 · Rim Monogram

1. The idea

A takeaway cup seen **from above**: its rim forms a **C** that holds the **1**, making the **C1** monogram. The closed ring with a single figure inside reads like a **seal of approval**, which supports our promise "Your brand. Every cup. Fully documented." It avoids the category clichés we found in competitor logos (side-view cups, leaves, coffee beans, steam).

2. Brief (from the approved Phase 3 strategy)

Name	Cup1 (capital C, numeral 1, no space)	**Personality**	Clear · practical · proof-led · quietly confident
Audience	Café groups, chains and distributors in the USA & Canada	**Main uses**	Website header, 16px favicon, proposals, Sample Kit box, email signature
Avoid	Leaves, globes, steam, coffee beans, side-view cup icons (used by CupPrint and LogoCup), gradients		

3. Concepts reviewed

Concept	Verdict
A · Cup & Lid (side-view cup with "1" cut out)	Friendly but generic; too close to category cup icons
B · Rim Monogram (C1)	**Chosen**: unique in the category, works as a seal, strongest at 16px
C · Cup-shaped "u" in the wordmark	Rejected: the "u" reads as a "V" ("CVp1")

4. Logo versions

5. Clear space and minimum size

Keep clear space of **x = ¼ of the icon height** on every side (shaded square). In the horizontal logo, measure x from the icon.

Version	Screen min.	Print min.
Horizontal	96 px wide	25 mm wide
Stacked	48 px wide	15 mm wide
Icon	24 px	8 mm
Favicon (heavier small version)	16 px	–

6. Colors

Use	Icon	Wordmark	Background
Primary	Harbor Teal #1F4E5A	Ink #1C2B2E	White, Paper #F7F3EC, Kraft Tint #EDE5D8
Reversed	Paper #F7F3EC	Paper #F7F3EC	Harbor Teal #1F4E5A, Ink #1C2B2E, dark photos
One color	Black #000000 or white #FFFFFF only		Single-color print (stamps, embossing, fax)

Contrast: teal on white 9.2:1, teal on Paper 8.3:1, Paper on teal 8.3:1, all above the 3:1 minimum for graphics.

7. Don'ts

Stretch or squash | Recolor | Rotate | Add effects or shadows | Place on busy backgrounds

Also: don't rebuild the wordmark in another font, rearrange the icon and wordmark, or put the "1" outside the rim.

8. Favicon and app-icon set

File	Size / note
favicon.ico	16, 32, 48 px – heavier small-size mark on a teal tile
favicon.svg	Scalable teal tile; visible on light and dark browser tabs
apple-touch-icon.png	180×180, solid teal background
icon-192.png · icon-512.png	Android / web app
icon-maskable-512.png	Mark inside the central safe zone, full-bleed teal

site.webmanifest · favicon-snippet.html	Paste the snippet into the website <head>

Trademark: before registering or printing at scale, run a professional trademark search (USPTO, CIPO, WIPO Global Brand Database). This guide is not legal advice. Wordmark set in Inter Display ExtraBold (SIL Open Font License), converted to outlines.
